

ANNUAL: FALL OF 1891—SPRING OF 1892.

# HIGHLANDS NURSERY

LINVILLE, NORTH CAROLINA, U. S. A.

Harlan P. Kelsey, Proprietor

WHOLESALE CATALOGUE

OF

Native Trees, Flowering Shrubs and Herbaceous  
Perennial Plants

OF THE

SOUTHERN ALLEGHANY MOUNTAINS and the SOUTHERN STATES.

■ ■ ■ ■ ■

*Many of our best wild flowers are distinctly novel—as unlike anything that Europe furnishes as our native red man is unlike the Caucasian. Their domestication would marvelously enlarge our garden calendar—at once relieving the time-worn monotony which has come to characterize it, and giving us flowers always equaling, and in many instances surpassing in beauty and effectiveness, the finest trans-Atlantic varieties.*

## IN ORDERING, PLEASE NOTICE THE FOLLOWING :

**PRICES** herein abrogate all previous quotations, and include packing and delivery at our depot, Cranberry, N. C.

**TERMS:** All bills are due on receipt of goods, excepting special agreements. Unknown customers should send cash or satisfactory reference.

**DISCOUNTS:** Where cash accompanies the order a special discount of 5 per cent. may be deducted from the amount. On orders amounting to \$25, five per cent.; on orders amounting to \$50, seven per cent.; on orders amounting to \$100, ten per cent.; on orders amounting to \$200, fifteen per cent. Five plants of a kind at 10 rates, twenty-five at 100 rates and five hundred at 1,000 rates.

**FOREIGN REMITTANCES** should be made by *International Post Office Money Order*, payable at Asheville, N. C.; by *New York Exchange*, or by *Cheque Bank Cheque*.

**CLAIMS** must be made immediately upon receipt of plants, when any error on our part will be gladly rectified.

**PLANTS** marked "col." are lifted carefully from open woods and trimmed before shipping. All others are nursery grown.

**Special Rates given on very large orders.**

---

## A LITTLE READING.

To those who examine this catalogue with a view to business or otherwise, and especially to nurserymen, florists, park and cemetery superintendents, and planters generally, we would like to say a few words which may prove of interest.

It is a well-known fact that till within the last few years American parks, gardens, cemeteries, lawns and other grounds have been stuffed to overflowing with importations from foreign lands to the almost entire exclusion of our beautiful native ornamentals—a class comprising an unrivaled wealth of grand and stately trees, magnificent flowering shrubs, and an unparalleled profusion of fine herbaceous plants and showy climbers; while the beautiful and manifold forms of terrestrial orchids and great variety of delicate and graceful ferns are beyond comparison.

Nurserymen's lists have catalogued but few of these "wild plants," and landscape gardeners were cautious about bringing them prominently into their plans for parks and private grounds—which would but cater to the *perverted tastes* of an American people.

Had the nurseryman filled his nursery rows with native plants, his trade would have been extremely dull, and had the gardener used them conspicuously in his planting of public grounds and private lawns, he would have had but little call for his services.

But it is a pleasure to note the decided reaction that is taking place, and year after year we see a rapidly growing demand for "natives" by a plant-loving public; in fact, many of the newer public and private parks and pleasure grounds have a predominance of native plants in their make-up.

Further, some of the best horticultural journals of the country are devoting much of their space to the popularizing of the subject, and it is only a matter of a short time when American plants will be used and appreciated in America as they should be. "We want every private pleasure-ground in which our wild blooms once grew, to become familiar with their lovely presence again; we want to see them in our parks and squares, native flowers overshadowed by the swaying arch of native oaks and elms." To be up to the times, nurserymen and florists must now catalogue at least a partial list of these plants, and landscape architects and superintendents must use them extensively.

For seven years the Highlands Nursery has been growing and pushing forward *native plants exclusively*, and it is extremely gratifying to us to be made aware of the rapidly increasing demand for them, especially the past two seasons. We anticipate for the coming season, however, much larger sales than before, and have prepared for it by putting in an exceedingly large and fine stock, to which constant additions are being made, while our prices are as low as is possibly consistent with good stock.

The location of Highlands Nursery, at the summit of the Blue Ridge in northwestern North Carolina, at an altitude of nearly 4,000 feet, insures long, cool summers and moderate winters, which is very favorable to the growth of these beautiful native trees, shrubs and herbaceous plants, and produces a **HARDY** stock—an important point to be taken into careful consideration by northern planters. While we confine ourselves principally to the plants indigenous to the Southern Alleghany region, still we collect all over the Southern States, and shall be glad to give information as to any plants not found in this catalogue. All correspondence will be carefully and promptly answered.

Address, **HARLAN P. KELSEY,**

*Highlands Nursery.*
